

Startup Name: Smart University

One Line Description: AI-powered platform for university program discovery, student matching, admissions workflow, and partner analytics.

Problem: students, parents, education agents, and universities handle program selection and admissions through fragmented manual workflows.

Solution: AI-powered platform for university program discovery, CRM, rating, admissions workflow, analytics, and later Housing Management vertical.
ICP: universities and education agents serving cross-border applicants.
Users: students and parents comparing programs and admissions options.

Buyers: university admissions and agent partnership teams.
Geography: Kazakhstan launch, then Central Asia and selected international partners.
Stage: Working product / pre-scale

Business Model: B2B SaaS plus success fees for education partners.
Pricing: Starter 240 000 KZT/month; Growth 690 000 KZT/month; Enterprise custom KZT/month; implementation fee separate.
Channels: university pilots, education-agent partnerships, webinars, school counselor referrals, and targeted admissions campaigns.

Competitors: manual spreadsheets, agency CRMs, university portals, marketplaces, and generic student recruitment tools.

Market Formulas: TAM = students applying abroad * serviceable platform fee; SAM = target geographies * reachable institutions; SOM = pilots * conversion.

Assumptions: rating methodology combines program fit, budget fit, admission probability, student outcomes, and appeal workflow.

Assumptions: 35.2M KZT platform round funds platform work.

Assumptions: 8.0M KZT Housing Management pilot is later gated; 35.2M KZT platform round is separate.

Assumptions: revenue and EBITDA are forecasts, not actual performance.

Assumptions: 2027-2031 revenue and EBITDA are forecasts, not actual performance, and require separate validation.

Weaknesses: legal basis, privacy consent, rating explainability, anti-fraud controls, appeals, data freshness, and SLA must be proven.

Weaknesses: Housing Management no-go until legal, fire-safety, sanitary, insurance, landlord, and student-support gates pass.

Strengths: product modules, domain workflow, and partner economics are described.

Smart University sanitized implementation notes for a private raw owner document source block F001: product, market, stage, roadmap, risk, and university technology business plan. This block contains no text.

Smart University sanitized implementation notes for a private raw owner document source block F002: product, market, stage, roadmap, risk, and university technology business plan. This block contains no text.
